

Last Call Reply

Set “LastCall reply“ to any Function key.

Key Function	
Key Lock	Manual
Short Key P1	Power
Short Key P2	VFO/MR
Long Key P1	LastCall Reply
Long Key P2	Roaming

Last call reply“ does what the name says:
It sets the AnyTone to answer the last call.

On a call to a Talk Group, it sets it to the incoming Talk Group.

On an incoming Private Call, it sets the AnyTone to call the caller as Private Call.

Info by Markus Große-Schware

Information

Private call can be done on either time slots and the other party will receive you.
If using a Repeater use the secondary slot, as while your in private call that slot can not be used by others (UK use Slot 1 as Slot 2 is Primary).

**Private call via a repeater does not mean that others can not listen in.
Newer radios can listen in, so be aware of what you say over the air.**

**This can also happen over a Hotspot if someone is close enough to your Hotspot
and has your frequency and Colour Code.
Your Hotspot information is public via Brandmeister Dashboards.**

All Amateur Radios rules apply when using Private Call.
