

Motorola RAS and CAP+

Anytone has a licence from Motorola to make DMR Radios.
The licence does not include RAS or CAP+

We have checked with Motorola, currently the RAS and CAP+ function is not included in our license, it will not be possible to add this function to our radios.

RAS and CAP+ is proprietary to Motorola, and is only offered in Motorola radios.

If you need RAS or CAP+, then buy a Motorola radio that offers it.

RAS = Restricted Access to System
CAP+ = Capacity Plus
