

Talk Group FREE Mode on a HYTERA Radio via DV

In CPS change the following settings

Conventional – General Settings – Menu

Set - Menu Reset Time – to Infinity

Conventional – Digital Common – Basic

Set – Group Call Hang Time – to 30s

Set – Private Call Hang Time – to 30s

Now to use

1. Talking on Talk Groups

Go to Menu – Contacts - manual dial and push # to set to Group call

Type in any TG (one you might not have in the radio)

Key up and as long as anyone responds in 30sec you now have a open channel to RX and TX on.

It will stay open as long as there is chat and does not drop for more than 30sec

If you drop out after 30s just key up again.

2. Talking to another uses via Private

Go to Menu – Contacts - manual dial and push # to set to Private call

Type in the users ID 7 Dig number you wish to talk with

Key up and as long as they responds in 30sec you now have a open channel to RX and TX on.

It will stay open as long as there is chat and does not drop for more than 30sec.

If you drop out after 30s just key up again.

Hope you have fun with this :)
